

NEW Price List effective January 5, 2022

Dear Ebie

We, at SICK sincerely thank you for the excellent collaboration and the success we have had together. It will remain our ambition to provide you with innovative products, systems and services so that your expectation of us as a market leader will continue.

Due to ongoing raw material and electronics shortages globally, certain components prices have increased up to 100x. One example is a single chip used in our scanner has increased from €0.4 to €22.

While we have made every effort to reduce our global and local operating and production costs, we need to adjust our list prices by an average of **5%**. This does not apply to phase-out products, certain product families or services, whose prices we will adapt separately.

If you have any questions, please feel free to contact us on email: info@sickautomation.co.za. We are looking forward to supplying you with our high-quality systems and services in 2022.

Yours sincerely

Grant Joyce
