25<sup>th</sup> March 2022

Dear Valued Customer.

Subject: Price increase effective from 2<sup>nd</sup> May 2022

Please be advised effective 2<sup>nd</sup> May 2022 we will be having a price increase.

External factors continued to put significant upward pressure on product costs. We've seen significant increases in logistic input costs mainly driven by the Covid impact globally and more recently the Russia/Ukraine crisis with fuel costs rising significantly.

Rising inflation is also impacting on input costs such as product manufacturing material costs and import base costs. Certain material shortages are also adding to the rising input costs.

Considering the above we have nevertheless endeavored to keep our increase to a minimum. Please contact your local Omron representative for further details or for a copy of the latest Price list.

Thank you for your on-going support, loyalty, and commitment to the Omron brand during these challenging times.

We assure you of our ongoing commitment to best possible customer service.

Yours truly,

Country General Manager  
Omron Electronics (Pty) Ltd
